

1.

Cut a strip of cardboard, about 15cm wide and long enough to wrap around your head, its helpful to have about 2cm extra so the ends will have a small overlap.

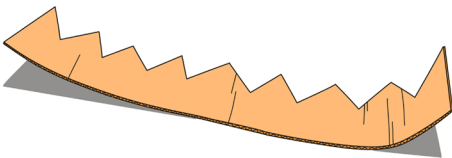

TOP TIP - Make sure you can see the curvy fluting along the long edge of the piece, this will make it curve into a smooth loop!

2.

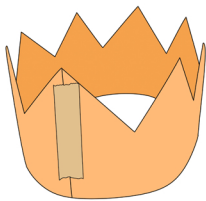

Then curve your cardboard strip so it has a long gentle curve, if you have your fluting running the right way this should be easy and smooth!

3.

Next cut out the decoration on one edge of the cardboard, remember it doesn't need to be pointy, you can make your crown any way you like!

4.

Then loop the two short ends together and join them with tape, you should then have the start of your crown!

5. Now for the fun part—decorate your crown and truly make it your own ... just remember, once you've got the crown, but don't let it go to your head!
